

## **UPDATE ON NANDA INTERNATIONAL BOARD**

Your board has made two changes related to the resignation of Rona Levin, who resigned after serving NANDA International in several roles. I am grateful to Dr. Levin for her contributions, and I am hopeful that she will continue to serve in other capacities.

The first change is the appointment of Leann Scroggins to the Executive Board to replace Rona Levin. Leann is responsible for the Diagnostic Review Committee and is a strong and productive Board member.

The second change is the recruitment and appointment of Jane Brokel, PhD, RN to the Board. Dr. Brokel is the Director of Clinical Transformation for Clinical and Physician Services at Trinity Health in Novi, Michigan. It is the fourth-largest Catholic health system in the USA which serves persons through its network of hospitals, long-term care facilities, home care and hospice programs, senior living communities, physician offices, and other health care services in 7 states.

Dr. Brokel has advanced degrees in Nursing Administration with Health/Nursing Informatics from The University of Iowa College of Nursing and holds Adjunct faculty positions at the University of Michigan School of Nursing and The University of Iowa, College of Nursing. Her research focus is in healthcare information technology (co-PI for AHRQ HIT Implementation Grant) and nursing informatics (co-investigator with AHRQ HIT Value Grant) related to outcomes-based care planning, critical thinking and decision support rules, and the utilization of theory, concepts and research knowledge in practice and nursing administration. In her Clinical Transformation role Dr. Brokel:

- Provides consultation and education services to member organizations for Project Genesis, the implementation of 3 core healthcare information technology systems with focus on the electronic health record.
- Staffs and services the Clinical Rules Oversight Group in use of evidence-based care sets and clinical rules.
- Designs strategies to support member organizations in the processes of care planning using uniform clinical languages and national information system standards.
- Preceptor's student interns and teaches in the area of nursing informatics and administration.

Please join me in welcoming this new and highly qualified Board member!

Marty Craft-Rosenberg PhD, RN, FAAN  
President, NANDA International.
